PERSONAL PROFILE

As an innovative tech mind, the world of programming has always intrigued me. Starting my programming journey on virtual platforms, it has allowed me to solve exciting challenges and problems. Since then, I have been on the hunt for new technologies and learning about upcoming frameworks and languages that are able to solve issues and create solutions more efficiently and effectively. Exposing myself to different coding languages and frameworks, it is truly a blessing that I am given the opportunity to be on the path of a software developer where I can enable myself to learn and discover more ways and means to fuel my passion in becoming a better developer.

SKILLS

Systems: React.js, React Native, Node.js, Express, Firebase, MySQL, Git, Oracle SQL
Language: JavaScript, Python, C++, C#, SQL

WORK EXPERIENCE

AAStar Trading Pte Ltd - Software Engineer Intern   SEP 2022 - APRIL 2023

- Work with a group of teams where we maintain and develop the company's internal web application (ERP System) to help better automate core business processes.
- Work with end-users to design and develop a better system to streamline and refine the process to better enhance the current modules.
- Have weekly meetings with other colleagues to discuss and present our modules so that we can share ideas and logic with one another.
- Debugging errors reported by end-users

Croda Singapore Pte Ltd, Jurong Island — Administrator   SEP 2019 - APRIL 2020

- In charge of the front desk and provides support to other staff in Croda.
- Sources and liaises with vendors/suppliers to provide the necessary equipment when there are events.

EDUCATION

University of London - Bachelor of Computer Science   OCT 2020 - SEP 2023

- Modules Taken: (1) Algorithms & Data Structures I & II (2) Object-Oriented Programming (3) Agile Software Programming (4) Programming with Data (5) Databases, Networks & the Web

Virtual Learning and Development

- Udemy Courses: (1) 2022 Complete Python Bootcamp (2) The Complete 2022 Web Development Bootcamp
- Google Cloud: Big Data & Machine Learning Fundamental Course (Aug 2022)
    - Machine Learning, SQL, and other databases optimization and representation skills

Nanyang Polytechnic - Diploma in Engineering with Business   APRIL 2014 - MAY 2017

- Graduated from Nanyang Polytechnic, completing the course with merit.

ACADEMIC PROJECT

UOL Agile Software Programming - Web Application Development, Fixlah App, Service Provider Platform
APRIL 2022 - JULY 2022

- Leading a team of 4 in developing an web application that helps to cater all types of personnel that are looking to provide services or looking for services online.
- Developing a React-based web application using React Native with Firebase to implement system authentication and other storing and sorting of input information
- System Used: React.js, Firebase, HTML, CSS

UOL Programming with Data - Data Scraping & Visualisation   APRIL 2022 - JULY 2022

- Processing cleaned data, normalising & scaling
- Web Scraping online data to enrich the visualisation with the help of different Python tools and frameworks.
- System Used: Python, Jupyter, Python Libraries
